

Babolna Roster Proposal 11/10/2007

From: Al Khamsa Board of Directors

Subject: Notice of Roster Proposal for Vote at 2008 Convention

The Al Khamsa bylaws state that a proposal to add horses to the Al Khamsa Roster requires that the motion be made to the President by November 1 of the year prior to the first vote, by November 10 to the full Board, and 30-60 days prior to the annual meeting to those who will attend and vote at the annual meeting. This notice is meant to fulfill the third requirement, before the October 24–26, 2008 annual meeting and convention in Tulsa, Oklahoma.

The Board will vote whether or not to approve the proposal and send it on to those present and voting at the annual meeting. If the proposal passes both of these steps, it will be voted on for a second time at the 2009 annual meeting. This is a difficult process, and it is meant to be difficult in order to protect the Al Khamsa Roster.

This is an unusual Roster Proposal, in that there are very likely none of these horses present in otherwise eligible pedigrees in North America at the current time. There is a precedent.

In 1986, Al Khamsa approved a proposal that, for the record, contained horses that had been included in the Blue Catalog or were otherwise well documented but were lost in North America by the time Al Khamsa began in 1975. Thus the Rogers imports from Bahrain and Saudi Arabia, the Raswan/Zietarski imports to Poland and Hungary in 1931, the Davenport import *Euphrates and the Blunt import Meshura (BLT) were all officially given Al Khamsa status. Since 1986, some imports and new additions voted to the Roster have brought some of these horses back into representation in modern Al Khamsa pedigrees.

The Database Committee, under the leadership of Sara Jones, is working to identify and catalog everything that ever was an Al Khamsa horse, and was then lost. It is a vast job, but when completed, will enable the serious researcher to identify the Al Khamsa percentage in a given modern Arabian horse, something that is not possible now.

Jeanne Craver has moved that the following Babolna-bred horses be approved as ancestors of Al Khamsa horses:

3 Siglavy Bagdady VI
*238 Kuhaylan Zaid-8
*240 Koheilan VIII-5
*Sigleilan

There are otherwise eligible descendants from 3 Siglavy Bagdady VI or her parents in Europe, in combination with Al Khamsa lines. The three imports to the USA are gone, and are identified “for the honor of the thing.”

An international group of people is helping with the assembly of documentation, and without their assistance, this would not be possible. A list of all Foundation Horses and their descendants that connect the Foundation Horses to the more modern horses can be found at the following link: <http://alkhamsa.org/site/rosterproposal.pdf>

Proposed Horses, Bred by Babolna:

***240 Koheilan VIII-5 (Koheilan VIII/2 Mersuch I)**

***231 Kuhaylan Zaid-8 (Kuhaylan Zaid/2 Mersuch I)**

THE BABOLNA NAMING SYSTEM

Each horse at Babolna received its sire's name, followed by an Arabic number that indicates foaling order in that particular year. Gender is not indicated. (Example: Ghalion-14) When a stallion joins the stallion battery, a Roman numeral indicating order of entry into service of his sire's sons replaces his Arabic foaling number. (Example: Farag III) When a mare enters the broodmare band, she retains her Arabic foaling number, but she gains a broodmare number which is Arabic and precedes her name. (Example: 26 Ibn Galal-15) The broodmare numbers are re-assigned to upcoming fillies when mares die or are sold. It is possible, under this system, to have different horses with the same name. It is also possible for the same horse to have a change of name. At Weil a different procedure was followed. Foals often received the name of their sire or dam, depending on gender, with a Roman numeral following the name. (Examples: Czebessie V, Bournu II) Sometimes a name was repeated with a birthdate attached as an identifier. (Example: Amurath 1829 and Amurath 1881) At times a name is used without the modifiers and the context is expected to provide the final determination between horses of the same name.
